

Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an intercontinental organization consisting of Diesel Engines, Defense Industry goods, Industrial Vehicles, Construction Equipment and Machine Instruments and Mechanization Systems.

In the United States, Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot production facility, which is the home of the Compact Equipment and Construction division. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Ohio is home to the Lift truck division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction client requirements.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. Also, there are more than 90 independent sellers moving forklift supplies and materials handling equipment. This network enables Doosan Infracore America to aggressively compete in this competitive marketplace. The lift truck product line impressively includes 63 different products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these various truck versions range from 3,000 to 33,000 lbs. All vehicles are manufactured in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest developing forklift and lift truck company in the North American market, due to its exceptional level of product performance and their consistently high level of customer support and service given to all Doosan Infracore Forklift clients. The U.S. lift Truck division stationed in Cleveland has a professional team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's initial domestic forklift marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. begun to import assembled lift trucks as part of a national equipment expansion venture. Initial sales of this industrial equipment focused on large business communities, the armed forces and on state-run companies. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical education grew to become the new focus for improving quality and product development.

Daewoo began the first domestic forklift business in 1967, and quickly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological enhancements combined with sales success placed them in a position of considerable expansion of their lift truck business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the very competitive North American materials handling market. This joint-venture proved highly lucrative for Daewoo and their forklift product sales expanded greatly. In 1984, the company finished development of a new facility to help in manufacturing high end value-added goods for export. In 1993, the company had a global sales network and started exporting versions they had developed through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas marketplaces.
