

Advance-Nilfisk Part

Advance-Nilfisk Parts - Imagine how long and tiresome it would really be to clean-up after a party, without help from equipment. Not too long ago, the dirt from upholstery and carpets had to be beat out of them manually; brushes, cleaning cloths and brooms were the leading cleaning products during that time.

P.A. Fisker, the man who founded Nilfisk-Advance, was actually an electrical engineer who loved working with electrical motors. Founding the business in 1906, he started to make motors so as to drive machine tools, coffee grinders, drills and fans. Mr. Fisker's vision from the beginning was to have a worldwide business advertising goods globally.

The Nilfisk C1 was a revolutionary breakthrough in the cleaning industry. Mr. Fisker invented an amazing, ground breaking vacuum cleaner that can be operated by one person for the reason that it only weighed 17.5 kilos! This invention came in a time where other cleaning machines were massive and required at least 4 operators, thus, the Nilfisk C1 changed everything and evolved the manner we clean forever. The genius behind these first cleaning machines remains unparalleled. Cleaning machines provide a brilliant solution to an existing dilemma; things get dirty and must be cleaned on a regular basis, without a lot of effort.

Little by little, the business Nilfisk-Advance expanded through the years. During the the early part of the 1980's the company expanded fast when the company became a part of the NKT Group. With new owners on board, they focused on driving Nilfisk-Advance forward within the industry, trying to be an active global player in making professional cleaning equipment. Nilfisk-Advance is presently located in all parts of the globe by gradually acquiring numerous small businesses so as to expand their product portfolio and presence in new markets. They are really proud to provide different cleaning solutions to meet each requirement.
